

INN WATER

Promoting social innovation to renew
multi-level and cross sector water governance

IN A NUTSHELL

3 Million €	13 Partners	1st March 2023 Starting date
5 Pilot Sites		6 Countries
3 Years		

UK Research
and Innovation

Funded by
the European Union

01 Objective

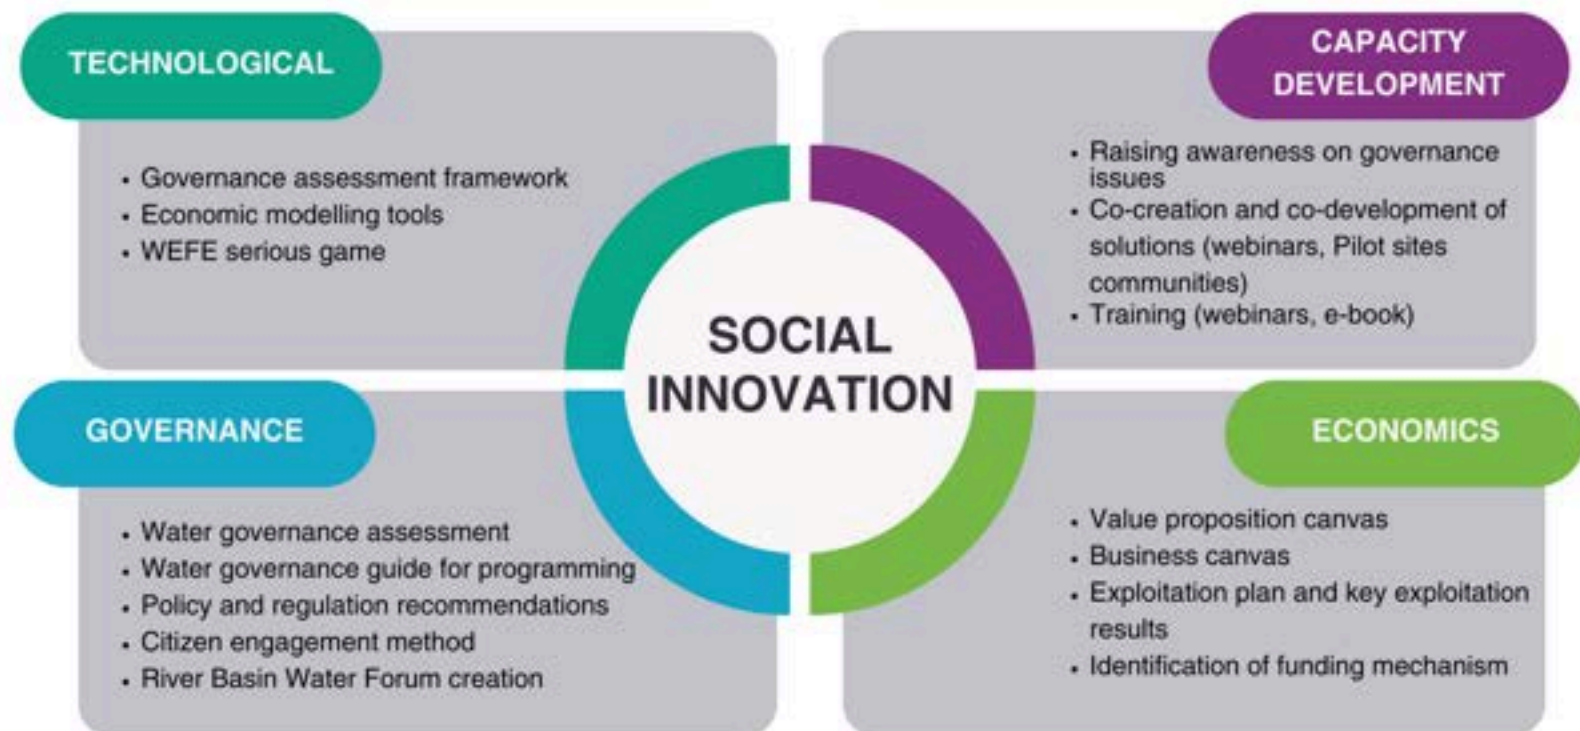

InnWater supports **multi-level** and **cross-sectoral water governance** for a transition to sustainable water systems

by developing a **set of digital tools and services** integrated in a single platform.

A specific approach: Social Innovation

The overall approach of **InnWater** is embedded in the social innovation approach that considers the (1) **technological**, (2) **governance**, (3) **capacity development** and (4) **economic dimensions** of innovative solutions.

By considering these 4 dimensions, InnWater aims to give to the stakeholders a clear role to **co-develop and experience tailored governance solutions** that they will use in an autonomous manner in the end.

Pillars 02

PILLAR 1

.....

Improved water governance assessment framework

Assess current governance approaches & identify best practices

PILLAR 2

.....

Stakeholders Engagement

Create River Basin Water Forums

PILLAR 3

.....

Economic and financial tools design for basin authorities and utilities

Link economics with water management

PILLAR 4

.....

Social innovation supporting InnWater Governance platform

An integrated platform for stakeholders and citizens to learn about water governance, explore governance mechanisms and support evidence-based decision

INN WATER
Pilot Site Community

03 Pilot sites

PS#1

Réunion Island (FR)

Economic focus

PS#5

Middle Tisza
(HU)

Water allocation

INN WATER
